## WARNING SIREN

When severe weather occurs, you will hear a steady tone for three minutes. Upon early warning, volunteers will attempt to set the Warning Siren to a STEADY TONE. This warning is to inform you to seek information from TV or RADIO. For residents that do not have adequate shelter, the Lutheran Church, 207 University Street, has offered the use of the church basement. Every effort will be made to get the rear (south) doors opened on alarm. **YOU SHOULD MAKE ALTERNATE PLANS IN THE EVENT THE CHURCH IS NOT OPEN!!**

Having a plan in place will minimize confusion when time is of the essence. Preplanning to bring flashlights, possibly a blanket, as well as making other arrangements for pets will make for quick access to shelter. (Please do not bring pets to the Church).

*This plan will be in effect immediately and until further notice.*

“Weather Alert” radios are available for purchase at local electronics or major department stores. These units can be used in addition to the local warning siren for early severe storm alerts.

According to Dunn County Emergency Management, the siren is intended to alert people outdoors that severe weather conditions are nearby. The sounding of these sirens is your cue to access local detailed weather information from radio or television and discover if there is an need to take further action. More information can be found on their site: [www.dunn.wi.co.us](http://www.dunn.wi.co.us), click on Departments, Emergency Management & Outdoor Warning Sirens.

Dunn County Communications Center is responsible for testing the emergency siren system. The Emergency Warning Siren is tested the first Monday of each month at 10:00 a.m. Standard emergency warning siren electro-mechanical tones are as follows:

- ALERT— Steady Tone, 3 minutes
- ATTACK—Wailing Tone, 6 sec. Hi/6 sec. Low, 3 min
- FIRE— Wailing Tone, 16 sec. Hi/8 Sec. Low, 4 Cycles
- GROWL— Short Burst, 2 Sec. Used for testing of siren only.
